

MAHESH BIRADAR

Solutions Engineer | Forward Deployed Engineer | Solution Architect

Pune, India | +91 7666530679 | mahesh.biradar9702@gmail.com

PROFESSIONAL SUMMARY

Solutions Engineer and Forward Deployed Engineer currently building voice AI agents for US law firms at Lexafide, translating client workflows into deployed conversational AI systems. Brings 5+ years of enterprise software experience, including five years as a Solution Architect at Ridecell leading multi-country product launches and serving as the primary technical interface between engineering teams and international business stakeholders. Strong background in system integration, API design, backend architecture, and cross-functional stakeholder management. Actively deepening expertise in AI deployment, agentic workflows, and enterprise automation through IIT Roorkee's Forward Deployed AI Engineering program.

CORE COMPETENCIES

Voice AI Agent Deployment | Solution Architecture | Client-Facing Technical Consulting | Multi-Country Product Deployment | API Design & Integration | Workflow Automation | Requirements Analysis | Business-to-Technical Translation | System Architecture | Backend Development | Production Debugging & Root Cause Analysis | Agile Delivery

PROFESSIONAL EXPERIENCE

Solutions Engineer | Lexafide

August 2026 – Present

- Serving as Solutions Engineer building voice AI agents for US law firms, acting as the technical bridge between client requirements and engineering implementation.
- Designing and deploying conversational AI systems that integrate LLM orchestration, voice platforms, and workflow automation tailored to legal industry use cases.
- Translating law firm stakeholder requirements into technical specifications for AI agent behavior, system integrations, and production deployment.

Senior Software Engineer | Solution Architect | Ridecell India Pvt Ltd · Pune, India

March 2021 – August 2026

- Served as primary technical interface for an enterprise fleet management platform across 3 European countries — owning stakeholder discovery, solution architecture, and post-deployment support end-to-end, effectively a Forward Deployed Engineering model before the title existed.
- Ran structured requirements-discovery sessions with international clients, translating operational needs from non-technical stakeholders into country-specific technical specifications and integration architectures.
- Presented architectural tradeoffs, timelines, and risk assessments directly to business stakeholders to enable informed decisions — regularly uncovering the real problem behind a stated requirement and proposing better alternatives.
- Designed and built REST API integrations with multiple international third-party suppliers, including structured data contracts, error handling, and retry logic across live production systems.
- Led a full microservice database migration (MongoDB → PostgreSQL) with zero downtime, and diagnosed and resolved complex post-launch production issues with long-term architectural fixes rather than patches.
- Mentored junior developers on API integration patterns and production debugging, scaling the team's capacity to take on new strategic initiatives.

TECHNICAL SKILLS

- Languages & Frameworks: Python, Django, Django REST Framework, JavaScript, HTML, CSS
- Databases: PostgreSQL, MySQL, MongoDB — schema design, migration, query optimization, ORM
- API & Integration: REST API design, third-party API integration, webhook orchestration, API documentation, Postman
- Architecture: Microservices, event-driven systems, multi-tenant architecture, distributed systems fundamentals
- AI & Automation: AI agent workflow design, prompt engineering, LLM integration, RAG concepts, agentic AI, n8n workflow automation, ElevenLabs Conversational AI
- DevOps & Tools: Docker, Git/GitHub, CI/CD basics, Jira, Sumo Logic, Periscope
- Methodologies: Agile / Scrum, SDLC, Solution Architecture, Requirements Gathering, Root Cause Analysis

CURRENT FOCUS AREAS

- Continuing the PG Certificate Program in Forward Deployed AI Engineering — IIT Roorkee (Continuing Education Centre) — covering AI deployment fundamentals, prompt engineering, RAG systems, agentic AI, and production readiness for enterprise AI deployments.
- Applying this directly in production as a Solutions Engineer at Lexafide, building end-to-end voice AI agent systems that integrate conversational AI platforms, workflow orchestration engines, and third-party APIs.
- Deepening expertise in enterprise integration, LLM systems, agentic workflows, and client-facing AI deployment methodologies.

EDUCATION

PG Certificate — Forward Deployed AI Engineering — IIT Roorkee CEC (in progress)

2026 – Ongoing

PG Diploma in Advanced Computing — CDAC Sunbeam Infotech, Pune

Feb 2020 – Feb 2021

Bachelor of Engineering — Aeronautical Engineering — Acharya Institute of Technology, Bangalore

Aug 2015 – Jun 2019

AWARDS & RECOGNITION

- 'The Rock' Award — Ridecell: Recognized for exemplary commitment to team functioning and consistent delivery across multi-country deployment cycles.
- Repeated recognition from management and team leads for outstanding debugging skills, analytical problem-solving, and root cause analysis in live enterprise environments.
